

55 Series Hydraulic Awning Window

The 55 Series Hydraulic Awning Window is a premium choice for residential buildings, designed with a thermal break to ensure exceptional energy efficiency. Powder-coated for a sleek, durable finish, this window opens a full 90 degrees, facilitated by a heavy-duty gas strut that provides smooth and reliable operation. Security is enhanced with a robust two-point locking system. The window features innovative weeping holes for superior water drainage, preventing moisture buildup. A durable, built-in screen offers protection from insects while maintaining ventilation. The Low-E2 tempered glass not only enhances safety but also provides excellent insulation, making this awning window a stylish and functional addition to any space.
