

60 Series Free Fly Folding Window

The 60 Series Free Fly Bi-fold Window is an innovative and versatile choice, perfect for enhancing residential spaces. Engineered with a thermal break, this window ensures superior insulation and energy efficiency in any climate. Its powder-coated finish provides a sleek and durable appearance, while the ability to slide in both directions offers flexible and convenient operation. Featuring Low-E2 tempered glass, the window enhances energy performance and safety. The self-locking mechanism ensures secure and reliable operation, while the included retractable screen offers protection against insects without compromising the view. The 60 Series Free Fly Bi-fold Window is a stylish and practical solution, combining advanced features with a modern design. **These are designed with a 2 1/2" (64mm) frame depth and can be seamlessly integrated with our windows to maximize views. They are available in widths ranging from 18" to 36" and heights from 47" to 112".**
