

TEZA 95 Series Folding Door

Explore a world of possibilities with TEZA Doors and Windows, where we don't just open doors, we create entrances to a better living. Welcome home.

TEZA's 95 Series Bifold Door, also known as a folding patio door, is designed for exterior use, providing a seamless transition between indoor and outdoor living spaces.

Product Overview

The TEZA 95 Series Bi-Fold Door delivers top-tier performance, durability, and style—perfect for expansive residential or commercial spaces. Foam-filled profiles provide excellent insulation for year-round comfort and energy efficiency. Its robust design includes U.S.-made heavy-duty hardware, a 5-point locking system, and adjustable hinges for secure, long-lasting operation.

Sleek and functional, it features a slim aluminum frame, integrated inside blinds, and customizable glass options. The 95 Series supports **panel sizes from 20" to 40" wide and 47" to 138" high, with a maximum panel height of 14 feet and up to 30 feet of total width**. A 1-inch bottom track ensures a smooth threshold, while triple weather strips per panel boost durability in harsh conditions—making it an ideal choice for modern, high-performance living.

Energy Efficiency

Glass can be clear or customized with coatings like Low E2 and Low E4 to enhance energy efficiency and comfort. These Low-E coatings reflect infrared heat, helping keep interiors cooler in summer and warmer in winter, while still transmitting visible light. They also improve insulation and reduce UV rays that can fade furniture. When combined with thermally broken aluminum frames, which provide additional insulation, these features significantly improve the thermal performance of windows and doors, resulting in increased energy savings, lasting comfort, and added value for both residential and commercial spaces.

Performance Chart

Frame Material	Aluminum 6063-TS
Frame Thickness	1.72mm DSLS115ZB-02A
U-Factor	0.30
Argon Fill	90%
Solar Heat Gain Coefficient	0.23
Visible Transmittance	0.51
Air Leakage	0.30
Sound Performance	0.30
Wind Load Resistance	77 mph

Inspection Report

Glass Options

Standard

DUAL-PANE INSULATED GLASS (1/4" - 5mm/pane)

This high-performance double glazing system features two glass panes separated by an argon-filled gap, significantly reducing heat transfer. This advanced insulation enhances energy efficiency, indoor comfort, and lowers energy costs, making it a smart choice for any building.

Custom

TRIPLE-PANE INSULATED GLASS (1/4" - 5mm/pane)

TEZA's TRIPLE-PANE GLASS features an advanced multi-pane design, offering exceptional thermal insulation that significantly outperforms standard glass. The additional layers of glass, separated by argon-filled air gaps, minimize heat and cold transfer, helping maintain indoor temperatures for greater comfort and long-term energy savings. This system also enhances noise reduction, while providing increased security and durability against impacts and harsh weather conditions.

Standard

LOW-E2 GLASS (OFFLINE) (1/4" - 5mm/pane)

TEZA's LOW-E2 GLASS is designed to minimize heat loss in winter and reduce heat gain in summer while maintaining excellent visibility and year-round energy efficiency. It adapts to various climates, blocking 85% of harmful UV rays and 65% of re-radiated solar heat, ensuring a comfortable and energy-efficient indoor environment.

Custom

LOW-E4 GLASS (OFFLINE) (1/4" - 5mm/pane)

TEZA's LOW-E4 GLASS delivers exceptional energy efficiency by reflecting heat back into the home while blocking 90% of harmful UV rays and 72% of solar heat. Designed for superior insulation and solar control, it also provides better insulation than standard glass and enhances soundproofing, making it an ideal choice for various climates.

Custom

HIGH-ALTITUDE INSULATED GLASS (1/4" - 5mm/pane)

TEZA's HIGH-ALTITUDE GLASS is specifically engineered for use in elevated areas above 2,000 feet. Instead of argon gas, it features integrated capillary tubes that equalize pressure between the glass panes, preventing issues like bowing and breakage caused by lower atmospheric pressure. This specialized design ensures durability, longevity, and optimal performance in high-altitude environments.

Custom

LAMINATED GLASS (1/4" - 5mm/pane)

Teza Laminated Glass is a safety glass designed specifically for windows and doors, featuring two or more panes bonded with a durable interlayer, typically polyvinyl butyral (PVB). This construction ensures that the glass remains intact when shattered, enhancing safety and preventing injury. Ideal for residential and commercial applications, Teza Laminated Glass also offers improved noise reduction and weather resistance, making it a reliable choice for any window or door setting.

Standard

Double Tempered Glass (1/4" - 5mm/pane)

Teza Double Tempered Glass features two panes of heat-treated glass separated by a sealed airspace, enhancing strength and safety. It shatters into small, blunt pieces if broken, reducing injury risk. The sealed airspace improves thermal insulation and energy efficiency, making it ideal for windows and doors in any area, including fire zones, where safety and durability are paramount.

95 Series Folding Door

The maximum limit of 6m(20ft) is to make 8 panels. The configuration is as follows:

1	 1+0	 3+0	 5+0	 <u>7+0</u>			
2	 1+1	 3+1	 5+1	 <u>3+1</u>	 <u>5+3</u>	 7+1	
3	 2+0	 4+0	 6+0	 8+0			
4	 2+1	 <u>2+3</u>	 4+1	 <u>4+3</u>	 <u>5+2</u>	 6+1	
5	 2+2	 3+2	 4+4	 6+2			

Note: The configurations with underline "_____" are not recommended due to load-bearing and durability issues!

95 Series Folding Door

220 Configuration - Low Track

By adding two more doors, the same configuration is as follows:
 Two doors 0+2,
 Four doors 0+4,
 Six doors 0+6,
 Eight doors 0+8

95 Series Folding Door

211 Configuration - Low Track

Inward folding
low Track

Outward folding
low Track

By adding two more doors, the same configuration is as follows:
 Two doors 1+1,
 Four doors 1+3,
 Six doors 1+5,
 Six doors 3+3,
 Eight doors 3+5,
 Eight doors 1+7

95 Series Folding Door

330 Configuration - Low Track

By adding two more doors, the same configuration is as follows:

One door 0+1,
Three doors 0+3,
Five doors 0+5,
Seven doors 0+7

95 Series Folding Door

321 Configuration - Low Track

By adding two more doors, the same configuration is as follows:

Three doors 1+2,
Five doors 3+2,
Five doors 1+4,
Seven doors 3+4,
Seven doors 2+5,
Seven doors 1+6,

Inward folding
low Track

Outward folding
low Track

Outward folding
High Track

95 Series Folding Door

422 Configuration - Low Track

By adding two more doors, the same configuration is as follows:
 Four doors 2+2,
 Six doors 2+4,
 Eight doors 4+4,
 Eight doors 2+6

Measurements and Rough Opening

TEZA products sizes its products from the frame to frame. The sizes on the invoice will be exact sizes of products. For rough opening requires 1/4" to each side (left, right and top).

Installation is the sole responsibility of the home owner, distributor user contractor, or their representative.

Notes

- For rough opening size, allow a minimum 1/4" gap between the Door and rough opening.
- All dimensions are in mm or inches.
- All dimensions are to be checked on site.
- Any discrepancy between the architectural drawing and other drawings relevant for construction should be notified before commencement.
- Sill pans are required by code for doors and windows.

Teza's aluminum products are exceptionally recyclable. In fact, aluminum is one of the most recyclable materials on the planet, capable of being recycled repeatedly without losing its quality or integrity.
